## SLOTETCH 584

### MICRO ETCH

SLOTETCH 584 is a micro etch specifically designed for the pre-treatment of printed circuit boards, integrated circuit lead frames, copper and Alloy 42 base materials.

SLOTETCH 584 is equally suited for use both in PTH and pattern plating stages of PCB manufacture.

- SLOTETCH 584:
- gives a consistent etch rate.
  - has a long life.
  - is easily maintained.
  - is economical to use.

**Important :**

Please read these instructions carefully and follow recommendations given.

We reserve the right to make technical changes as necessary.

In the interests of safety, please pay attention to the R- and S- phrases on the drum label.

The shelf life of the additives is generally 18 months.

The date of production is taken from the first part of the batch-number which shows the year and month. The final four figures are the specific batch code.
